ENGINEERING IS FOR EVERYONE

**SHOWCASING EVENT:
FACULTY OF ENGINEERING AND TECHNOLOGY**

Tuesday 13th May 2025

For Lower Sixth Formers/college student and their teachers. Whilst all students are welcome, we do particularly want to highlight to your female students (and those that identify as female), how Engineering and Technology is open to them as a prospective career path. Class groups should be no more than 15-20 students.

This event is for your year 12 students, to introduce them to the different aspects of Engineering, the career paths that can come from studying an Engineering and Technology course, and how Engineering and Technology is for everyone. Join us on Tuesday 13th May between 9.30am and 2.30pm and we'll provide your students with workshops in **ASTROPHYSICS, COMPUTING AND MATHEMATICS, AND MECHANICAL, CIVIL AND ELECTRICAL ENGINEERING.**

Students will also be able to talk to our staff and ask questions about our Foundation and Undergraduate Courses, as well as Degree Apprenticeships, and the careers that can come from studying these courses.

**To book onto the event or for any queries, please contact
Dave Leigh: d.w.leigh@ljmu.ac.uk**
